

## Innovative Quality Stainless Construction with **Strategic Partnership from Start to Finish**

As a design-build general contractor with specialized build methods, equipment, and a skilled experienced team, Adaptive Stainless is structured with segments suited to execute routine one-day repairs to full design-build projects covering years of commitment. Our commitment to safety, quality, scope, and schedule mitigates risk while ensuring the success of our clients through every step of the process.

### Repair & Service

Adaptive Stainless' Repair & Service segment is well-equipped to handle and manage a broad range of stainless steel craftsmanship, including repairs, service, modifications, inspections, and alterations. Our adaptive nature and outside the box thinking present safe solutions to limit or eliminate interruptions so clients can focus on their critical day-to-day operations and responsibilities.

### Design-Build & Construction

Through collaborative partnerships in a wide variety of industries, we have developed the skills to control scope, schedule, costs, and expectations to extend past the custom tank fabrication to include process, utility, controls, civil, building and infrastructure elements while further mitigating a client's risk through value-add construction management of a project's balance of plant objectives.

## Let's Collaborate & Build Together

We're always ready to take on a challenge, and we pride ourselves on being a trusted partner for our clients. This means joining our client's facilities, learning their culture and unique safety requirements, and earning their trust to maintain a working relationship moving forward. It's our goal to adapt so well to their facility that our clients can continue their day-to-day operations as much as possible, making their experience less stressful. When talented teams commit to collaborate and develop strategies to win together with skills to adapt, that allows projects to flourish and succeed.

# Capabilities

## Repair & Service

- Demolition, Relocation, Installation
- Overlay, Patching, Reinforcement
- Tank Integrity Testing, Reporting & Refurbishing
- Trusted Partner of Paul Mueller Company
- **ASME (R) Repair**
- Vessel Modernization
- Vessel Mechanical Repair
- Vessel Repurposing
- Vessel Electropolish
- Vessel Heat Transfer
- Vessel Modernization
- Piping Repairs

## Design-Build & Construction

- Conceptual Design
- Engineering, Procurement, Construction
- Field Fabrication of Tanks
- Project & Construction Management
- General Contracting (Nationwide Business and General Contractors Licenses)
- (U) Vessel Fabrication Stamp (S)
- Rigging, Cranes, Scaffolding
- API 650 and 620 Design and Construction
- Unique Build Methods and Equipment
- Dynamic Fluid and Thermal Process Design
- Process Development & Installation
- Controls and Instrumentation
- System Integration
- Nationwide Insurance
- Turn-Key or Expanded-Scope
